

Poker Hand Converter

Hand Converters are an appropriate option to visualize histories of played poker hand.

Here are 2 different kind of converters distinguished: Online- and Offline-Converters.

Online-Converters are only a part of a website, which includes often a [HH](#)-database.

Offline-Converters are a part of a software and often just one feature of many others, which allow you to track, analyze and visualize your hands.

The following table show just a number of possible converting-solutions:
