

# Hijack

The [hijack](#) is also considered a late game [position](#) in [full ring](#) games.

The [position](#) is called [hijack](#), because people tend to use it to "[hijack](#)" the positional advantage away from the [cut-off](#) and [button](#) by entering the pot for a [raise](#).

In 6max games the [hijack](#) is identical to [middle position](#).

In [fullring](#) games the [position](#) to the right of the [hijack](#) is also called lojack.

In games with more than six seated and dealt-in players the [hijack](#) is always the last [middle position](#) seat with the [cut-off](#) to its direct left.
