

# Button

The [button](#) is considered the best [position](#) in poker. Positioned directly to the right of the blinds in holdem or [omaha](#) it is the ultimate and best late [position](#).

As the [button](#) has [position](#) on all other players involved in a hand and being a late game [position](#), players are able to play a much wider [range](#) of hands.

In poker games without a dedicated [dealer](#) the [button](#) also has the task of shuffling and dealing the cards. This is indicated through a [dealer-button](#) that is placed in front of the player. After shuffling the deck is presented to the player sitting on the right (the [CO](#)) to cut the card deck before dealing.

The abbreviation for [button](#) is [BTN](#) or [BU](#).
