

Rakeback

[Rakeback](#) is usually offered from pokersites through affiliates, like pokermarket, that bring new players to the specified poker site.

Usually the [rakeback](#) systems are designed to reward loyalty with a higher amount of [rakeback](#), but there are also flat [rakeback](#) deals.

These are always win-win-situations for the player, the affiliate and also the pokersite as everyone gets a piece of the cake. The player gets more money through getting a better deal than signing with the pokersite directly, the affiliate gets either a [share](#) of the players [rake](#) or a bonus payment to bring the player to the site and the poker site gains a new customer that adds revenue to their company.

Pokermarket is a large affiliate that offers good [rakeback](#) and bonus deals for every important poker site on the market, including [rake](#) races for additional [rakeback](#) and also good deals on poker tools: pokermarket.com/deals.php#!/sites

You can use the pokermarket calculator to find the best deal for your style of play: pokermarket.com/deals.php#!/deals
